ATTN: J. Kenyon Schaeffer

Dear Mr. Schaeffer

This letter is written to commend Interstate Construction on the quality of work done on the recently completed C470 project. As the Project Manager on the project I was on-site and was impressed with IHC's aggressive schedule which exceeded the expectations of CDOT. The project was completed approximately seven months early even after the addition of \$1.7 million extensions to the project.

Due to partnering and cooperation between CDOT and IHC I feel that the end result of the project was of very high quality. The early completion was cost efficient, saved the commuting public valuable time and made for much safer condition for this winter. I have received numerous favorable comments from the CDOT management on this project.

In conclusion, I would like to commend and thank Interstate Highway Construction on delivering a superior product on a complex project which exceeded CDOT's expectations.

  
Michael R. Hodgson  
Project Manager
