Dear Max:

We would like to express our appreciation to Interstate Highway Construction (IHC) for their work as the general contractor on the Plaza Relocation Project. As you know, due to our growth, the decision was made to construct four exit plazas and two entry plazas closer to the parking facilities.

Throughout the project, the IHC staff showed diligence and the highest regard for safety as well as convenience. They were cognizant that we had an ongoing high volume parking operation. Steve VanOster, IHC's project manager, was always aware of our needs. He worked very closely with us to insure the construction would have minimal impact on our operation.

As with any project, some changes from the original design are necessary. IHC personnel was proactive, suggested changes to improve the project and was responsive when we required changes.

On August 28, 2000, we opened the new plazas with glowing reviews from our customers. With a project this large, a close working relationship with the general contractor is of utmost importance. We were pleased to work with the staff of IHC.

Sincerely,

A handwritten signature in black ink, appearing to read "Melissa M. Brum".

Melissa M. Brum
